

Having a Coronavirus Vaccine

To stop people getting coronavirus scientists have made a vaccine.

A scientist is someone who likes to understand and learn about things.

A vaccine is a kind of medicine.

A vaccine teaches your body to fight a germ or infection like coronavirus.

A vaccine can help stop you getting poorly.

Doctors and scientists say it is good to have the coronavirus vaccine.

The coronavirus vaccine is an injection in your arm.

You will need 2 injections to make you safe from coronavirus.

The injections will be 10-12 weeks apart.

If lots of people have the vaccine many more people will get better.
