

(DY10 Big Local) community grant provider, have considered putting our communication boards into 3 local parks- Springfield, Baxter Gardens and St George's but we need to prove a need for them.

The poll for the need ends in 2 days unfortunately. The poll can be found with the link below, it's a simple yes or no poll. We are not making a profit from these boards, this is solely a community project we would like to introduce to the area, the funding would be granted to cover materials only. One board has already been approved for Spennells Park, separate from this. I have also attached a copy of the board that has been designed as a draft but would be interchangeable for different play equipment on each park.
